

Snap-on relay outputs LSRA Snap-on relay outputs LSRA-T

Snap-on potential-free relay outputs

LSRA for the use of safety light curtains ULVT and BLVT

LSRA-T for the use of safety light curtains TLVT and ILVT

DIN EN ISO 9001
Rea.Nr. 96007

Typ 4
EN 61496

Typ 2
EN 61496

Easy-to-install serial connections with other safety sensors

Enables the connection to common safety bus nodes

Provides the solution for cost-saving serial connections

Offers high switching performance

Application	<p>The standard safety light barriers of the ULVT / BLVT and TLVT / ILVT series are equipped with electrical semiconductor outputs.</p> <p>In order to directly connect the barriers to the outputs using higher currents, i.e. higher voltages, the snap-on relay output module LSRA / LSRA-T has been developed.</p> <p>Both potential-free relay outputs of the LSRA / LSRA-T provide an easy-to-install serial connection of several safety light barriers or safety sensors.</p> <p>By the use of the snap-on relay output module LSRA, the safety light barriers of the ULVT and BLVT series can be connected to a multitude of safety bus nodes.</p> <p>By the use of the snap-on relay output module LSRA-T, the safety light barriers of the TLVT and ILVT series can be connected to a multitude of safety bus nodes.</p>				
Connection diagram					
	<p>!</p> <p>The cable layout of the cables between the terminals 2, 3, 4, 5, must be arranged in a way that there is no possibility of the conductors' short circuiting. Therefore all unprotected cables have to be installed in reinforced hoses and/or in cable channels.</p> <table border="1"> <tr> <td style="text-align: center;"> Required selection of operational modes at the receiver of ULVT / BLVT TLVT / ILVT </td> <td style="text-align: center;"> without contactor control not permitted </td> <td style="text-align: center;"> with contactor control </td> <td style="text-align: center;"> The operation mode with contactor control provides the monitoring of the Relay Output Module LSRA / LSRA-T. When operating the Relay Output Module with the ULVT / BLVT or TLVT / ILVT, the option "Relay Output Module" must be selected at the receiver head. </td> </tr> </table>	Required selection of operational modes at the receiver of ULVT / BLVT TLVT / ILVT	without contactor control not permitted	with contactor control 	The operation mode with contactor control provides the monitoring of the Relay Output Module LSRA / LSRA-T. When operating the Relay Output Module with the ULVT / BLVT or TLVT / ILVT, the option "Relay Output Module" must be selected at the receiver head.
Required selection of operational modes at the receiver of ULVT / BLVT TLVT / ILVT	without contactor control not permitted	with contactor control 	The operation mode with contactor control provides the monitoring of the Relay Output Module LSRA / LSRA-T. When operating the Relay Output Module with the ULVT / BLVT or TLVT / ILVT, the option "Relay Output Module" must be selected at the receiver head.		
Technical Data	<p>Maximum load capacity of the potential-free contacts: 5A / 50V</p> <p>Dimensions in mm: L: 116, B: 46, H: 70</p> <p>Weight : 200g</p> <p>LSRA ---> use with ULVT / BLVT</p> <p>LSRA - T ---> use with TLVT / ILVT</p>
