

The safety foot pedal FE-FS2-SU1ASDU1/U1-U use safety switches.
The right foot pedal have two positions (free position and pressed down position). It may e.g. be used for the selection of AKAS® Box bending function or opening of a press. The left foot pedal have 3 positions, with a pressure point, to control dangerous movements (for instance get down of a press brake ect...). It has 2 working contacts ( $1 \mathrm{NC}+1 \mathrm{NO}$ ) to drive the movement and one safety switch (1 positive opening NC contact + 1 NO ) to stop the movement. Pressing the foot pedal, till the pressure point, allows the changeover of the 2 working contacts. Once the pressure point is got over, the 2 working contacts return to their first position and the positive opening safety contact is activated in order to initiate immediately the dangerous movement. Thus a redundant information for the safety circuit is available.
A restart of the machine is only possible after releasing the foot switch.

## Switching diagram: <br> Switching elements:

Right pedal:

The contacts for the left and right pedal must be clearly identified during the circuit diagram creation!

| Execution | 2 aluminum foot pedal heavy version free standing on slip elastic feet |
| :---: | :---: |
| Operating voltage | max. 500 VAC, 40-60Hz |
| Switching current | max. 10 A . For inductive and capacitive loads, a contact protection must be provided. |
| Operations | min. 10 Mio. |
| Contact Material | Silver |
| Connection type | Screwterminal |
| Electrical connection | 0,5-1,5 mm2 |
| Cable entry | 3x M20x1,5 |
| Switching insert | Left pedal: <br> 1 changeover contact with tarnish, after pressure point 1 changeover contact, positive opening |
|  | Rigth pedal: 1 changeover contact, positive opening |
| Switching function | Left pedal: sequential circuit with pressure point |
| Pressure point | Left pedal: Min. 200 N operating force when used as intended |
| Switching system | Left pedal: Jump-/ creep mechanism |
|  | Right pedal: Creep mechanism |
| Housing | Die cast aluminum, powder-coated RAL 7021 (dark gray) |
| Pedal | Die cast aluminum, powder-coated RAL 7021 (dark gray) |
| Accident cover | Die cast aluminum, powder-coated |
| Attachment | For mounting of the footpedal in the housing bottom (pedal area) are provided $2 x \varnothing 4,5$ and $2 x \varnothing 6,5$ holes (see drawing). Here threads can be cut. Alternatively, the rubber feet can be removed and these threads can be used as a mounting option. |
| Protection type | IP65 to IEC/EN 60529 |
| Operating temperature | $-30^{\circ} \mathrm{C}$ to $+80^{\circ} \mathrm{C}$ |
| Regulations | IEC/EN 60947-5-1 |
| Order code | FE-FS2-SU1ASDU1/U1-U-xx <br> ( $\mathrm{xx}=\mathrm{RD}=$ cover firered RAL 3000 ) |

[^0]
[^0]:    Additional information:
    Any modification of the foot pedal and its components will void the warranty and product liability.
    In particular, lifting the die-cast aluminum pedal against the upper stop and driving out the retaining pin are prohibited.
    This can cause the foot pedal to malfunction and thus lead to a loss of safety!
